

18km Course Race Report

Regarding Mynavi SUP JAPAN CUP 18km Course Race held on September 15, 2018, due to a malfunction of the GPS unit used to position the course buoys, the actual length of the course was approximately 10km. Although the total course distance was approximately 8km less than intended, race participants followed the race format correctly and completed the correct number of course laps under the same conditions for all participants as per the race briefing. There were no race protests lodged either during or after the race.

Taking all details into consideration, the Race Committee, the Executive Committee and Race Officials took the decision that the race results are valid. The Organizer did not re-run the race. Race results and rankings were confirmed and documented as final, and the Organizer presented awards as per race results and rankings.

We sincerely apologize to all the race participants and all concerned parties for the inconvenience this has caused.
